

EUREKA YOUTH

SAVE THE KOALA

Koalas are iconic mammals unique to Australia. They can't live anywhere else on earth. Once widespread throughout our Great South Land, sadly in the past five years, their already depleted population has fallen from near 100,000 to 40,000. **Their extinction looms within two decades**, and the continuing population explosion of humans in Australia is the driving cause.

**END THE
IMMIGRANT SWARMS.
STOP DESTROYING
NATIVE KOALA HABITAT
FOR HOUSING SQUATS!**

Eureka Youth

demand the inheritance and preservation of our native soil, ancient ecosystems and unique wildlife, in a natural order free from the abuse, pollution, and destruction, inherent to senseless, population growth driven, neoliberal economics.

The decimation of our koalas and other mammals resulting from neoliberalism economic exploitation, is faster than in any other country. The decline is widespread, and extends to also dispossessing Australian youth from work by 457 visa scams and cheap immigrant labour.

Our call is for the implementation of the programme of ***New Era Australia Centric Economics, based on National Self-Sufficiency, Steady State Aims, and an Employment Service Corps***, guaranteeing full employment and sustainability for Australian youth. This will provide prosperity, and a bright future, where our koalas, eco-systems and wildlife of our Native Land flourish.

SAVE THE KOALA & Australian Youth from extinction- Join with
