Demands

Aussies fighting back

The inheritance of Australia, and our civilisation by Australian youth.
Freedom from the enslavement of drugs of dependency and death.
Free access to tertiary education facilities, before overseas fee paying students.
Maintaining generational equity via a sustainable natural environment to ensure a healthy organic based lifestyle.
Promoting our Australian culture, heritage and history, to enhance the sense of our nationality - not the political elites community destroying multiculturalism.
To advance our unique Australian identity as a European derived society as formed by our pioneering and settling peoples, and supported by our post war European migrants.
The needs of our Australoid races - the "Dark Sons of Australia" fully provided for.
An end to the big business driven Third World immigration plague, and the resultant environmental, cultural and economic decline.
A vision for a future beyond materialism and consumerism.
A non exploitive, more stable national self sufficient economy, devoid of useless products, and the unnecessary use of finite resources, to ensure fulfilling, worthwhile, and rewarding employment.
Retaining the eco-diversity of our ancient continent, without any excuses whatsoever.
A society of social justice, and of opportunity, that recognises the intrinsic worth of each individual, not judged by material assets.
To be rid of the false doctrines of globalists and internationalists
To attain true cultural, political and economic independence for Australia.
In short - we want Australia back!
